Printing tips

- Print at **100% / actual size**.
- Inside pages print fine in black and white.
- Print the ID card on thin card if you can.

Five-second T. rex facts

- The name means "tyrant lizard king": tyrannos is Greek for tyrant, sauros is Greek for lizard, and rex is Latin for king.
- Its fossils come from rocks dated to the end of the Cretaceous period, 69 to 66 million years ago.
- T. rex arms were only about 1 metre long, and each hand had two clawed fingers.
- Birds are the only living dinosaurs. They evolved from earlier theropods, the same big group T. rex belongs to.

Photos are public domain (several are US government works) or CC0 dedications, all from Wikimedia Commons; old paintings and scientific drawings are public domain by age, and may show T. rex as scientists pictured it at the time. Dinosaur, plant and fossil drawings are REALLYBYTE originals: stylised and not to scale. Fonts: Fraunces, Figtree and Patrick Hand (SIL Open Font Licence).

WHERE THE FACTS COME FROM

Every fact in this pack was checked against these sources on 24 October 2026 (full list in the trex.dinosaurs.im fact-check log). Sizes, weights, speeds and ages are scientists' estimates from the studies named, and estimates vary. Where scientists disagree, we say so.
